Changes regarding visits away from ICF/ID and RCF/PMI facilities

Effective June 1, 2020 we are implementing guidelines for screening processes when residents in our licensed facilities return from visits away from their living site. We have created a screening tool that will assist in assessing symptoms and possible exposure so that the return home can be as safe as possible for everyone involved. Feel free to direct any questions you have to your primary contact with Imagine.

Looking Ahead

We remain committed to monitoring the guidance provided by federal, state, and local officials. In addition, we are engaged with industry specific partners both nationally and within Iowa. Again, we will provide you with information and announcements regarding our response in this format each week as available.
